Hyku:

- Open source multi-purpose repository
- Part of Samvera, community of 35 partners
- Multi-tenant
- Turn-key cloud-based solution
- Modern technology
- Initially funded by IMLS in 2015

CC BY

Project Deliverables:

1. Auto-population
2. Metrics
3. Author profiles
4. Display and annotation
5. Long-term preservation
6. Strengthening architecture

CC BY

1 Integrating open-resource discovery tools to auto-populate repository contents

unpaywall

Open Access Button

Crossref

Google Scholar

CC BY

2 Adding metrics to indicate usage of contents

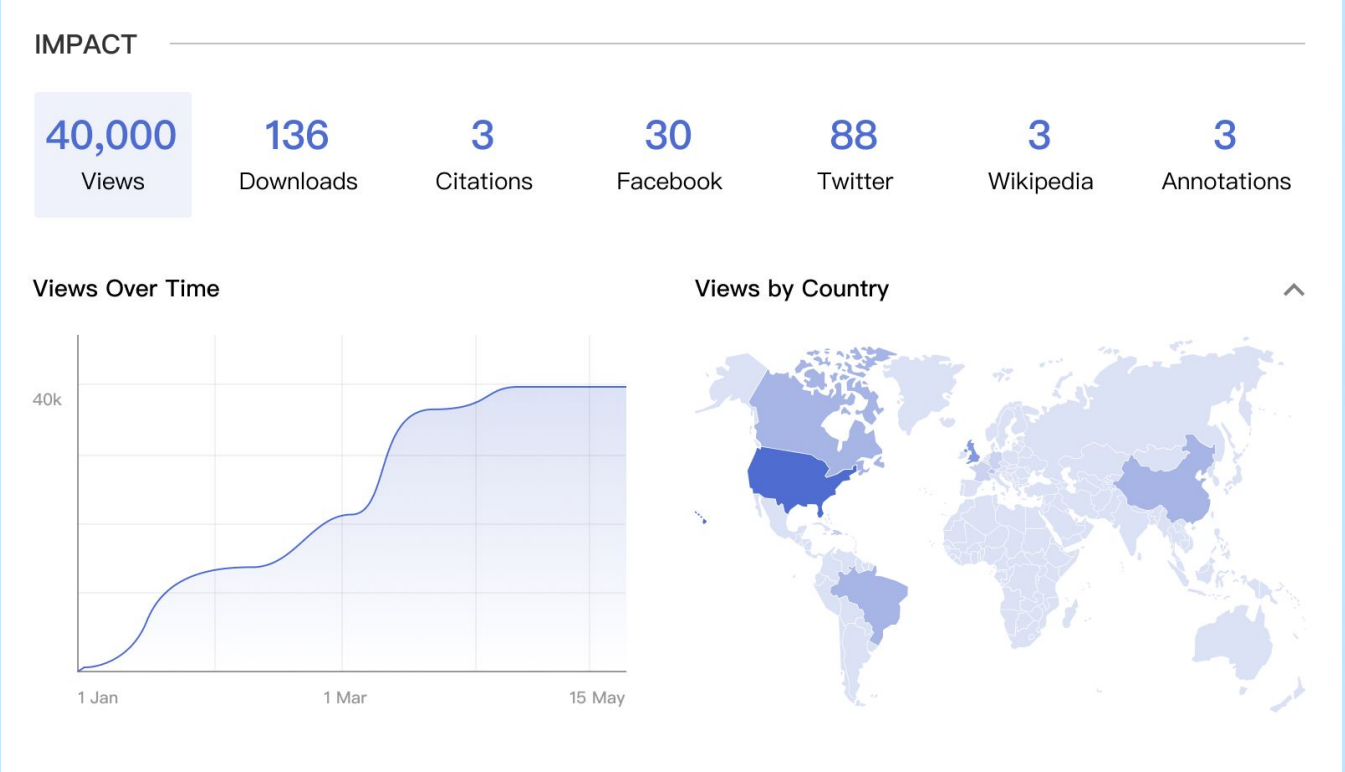
ubiquity analytics

HIRMEOS
High Integration of Research Monographs in the European Open Science infrastructure

Crossref Event Data

DataCite
FIND, ACCESS, AND REUSE DATA

OpenCitations



CC BY

3 Connecting and syncing with author identification and profile services

CC BY

4 In-browser display, visualization and annotation

CC BY

5 Establishing pathways to long-term preservation services

CC BY

6 Assessing requirements and jointly creating detailed, component-specific development plans
