

## Becoming an Advocate

### Author(s)

Caroline Whitbeck

### Year

2000

### Description

A scenario meant to stimulate discussion about ways of becoming an advocate.

### Body

Your research shows that the behavior of a certain substance poses a greater health or safety risk than was previously thought.

How, if at all, should you supplement any experimental testing with advocacy, or popular writing on this subject?

## Health Research Version

Your research shows that treatment T is a much more effective treatment for disease D than other existing and widely used treatments.

How, if at all, should you supplement any experimental testing with advocacy, or popular writing on this subject?

### Notes

Caroline Whitbeck introduced methods and modules for discussing numerous issues in responsible conduct of research at a Sigma Xi Forum in 2000. Partial funding for the development of this material came from an NIH grant.

You can find the entire sequence on the OEC at [Scenarios for Ethics Modules in the Responsible Conduct of Research](#). Some information in these historical modules may be out-of-date; for instance, there may be a new edition of the professional society's code that is referred to in an item. If you have suggestions for updates, please contact the OEC.

**Based on a suggestion from Lee Crandall.**
