Spring 2015 was a busy semester for UVA theses and dissertation deposits to the University of Virginia's Libra institutional repository. A comparison to the analysis done for the Spring 2014 deposits (<http://libra.virginia.edu/catalog/libra-oa:7408>) shows the following trends: a higher percentage of Science ETDs were given immediate OA (no embargo), but a lower percentage of HumSoc ETDs were deposited with no embargo. Over all these more recent statistics show a lower percentage (across all ETD groups) of ETDs with 5 year embargoes.
