Department of Computer Science, University of Virginia, May, 1995]

Browsers and the World Wide Web (WWW)

Q: What is the World-Wide Web?

A: Millions of computers,
all connected together!

Q: How do we find things?

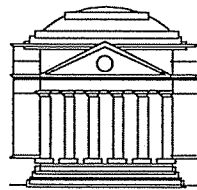

A: Uniform Resource Locator (URL)

<http://www.cs.virginia.edu/~robins/>

- Even business cards have URL's:

Dr. Gabriel Robins
Assistant Professor

Department of Computer Science
Thornton Hall
University of Virginia
Charlottesville, VA 22903-2442

Email: robins@cs.virginia.edu
WWW: <http://uvacs.cs.virginia.edu/~robins/>
Office: (804) 982-2207 FAX: (804) 982-2214

Cyberscope

INTERNET

Hair About It

BALDING MEN NOW HAVE A support group of their own. In the Usenet newsgroup alt.baldspot, the chrome-domed—and those on their way—are dealing with their loss, sharing experiences with various treat-

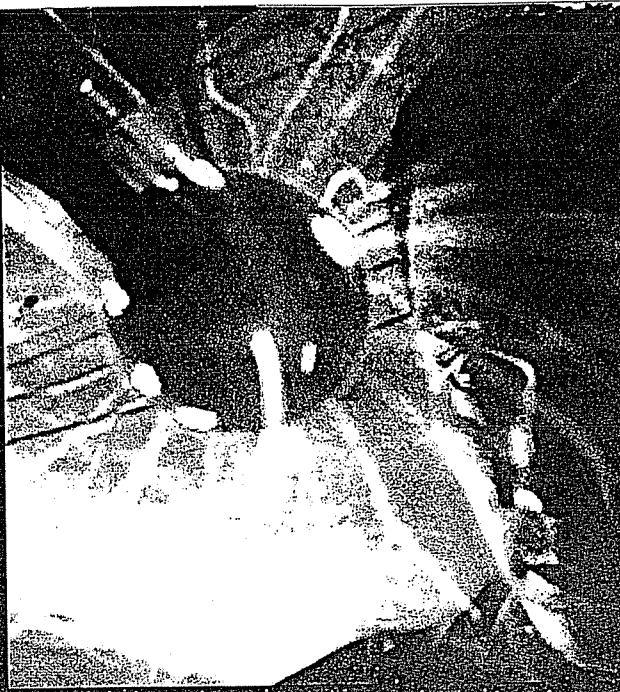

Pate: Receding or reseeded?

ments, even ranking the worst celebrity hairpieces. Resident guru Peter Proctor, a pharmacologist from Houston who dispenses advice online, says, "We know a lot more about what causes baldness than we used to, and people want to talk about it. This kind of discussion is filling a real need." Now if only you could download a bottle of Rogaine...

ART

It's a Wrap

CHRISTO, KING OF INSTALLATION art, now rides the Web. What to do after dotting California with giant yellow umbrellas? Shroud Berlin's Reichstag, the once and future home of the German Parliament, in silver fabric. Christo and his partner (and wife), Jeanne-Claude, unfurl their work in the middle of next month, and two sites on the World Wide Web will follow their progress. <http://www.kulturbox.de> will have the official line, and <http://www.nbn.com/you-can/christo> has a fan's look, with pictures and history.

A scene from 'Johnny Mnemonic,' the CD-ROM game

GAMES

Maybe the Movie's Better

SAY YOU'RE A 21ST-CENTURY DATA COURIER WITH A TOP-secret information packet stored in your brain. The packet is too large for your wetware chips, though, so you've got to deliver the goods within 12 hours or suffer a fatal migraine. The MacGuffin: your download code has been destroyed. That's the premise of Sony Imagesoft's new "Johnny Mnemonic" CD-ROM game. William Gibson's classic cyberpunk short story and a TriStar movie that opens this week. We're not sure how the heavily promoted game plays, though, because the one that Sony sent us didn't work very well. The video is grainy, the sound scratchy and the interface—or rather, lack of interface—confusing and balky. Get the audio CD soundtrack instead; the songs are recycled, but hey, at least it works.

PHONES

No Numbers

IF FIGURED. LOOKING UP freebie 800 numbers on the World Wide Web (<http://att.net>) was just slightly too cool. So now, right when we get into it, the 800 numbers start to run out. The Industry Numbering Committee responsible for this kind of thing has chosen the exchange 888 as the new toll-free code, and the new numbers go into effect April 1, 1996.

On a similar subject, all the other new area codes cropping up these days (CYBERSCOPE, 9/26/94) might cause trouble for the private phone switches called private branch exchanges, or PBXs. Without software updates, PBXs don't understand such lunacy as Los Angeles's new 562 code, and all the phones on the PBX lose the ability to call into those areas.

MUSIC

New Wave

GENUINE ARTISTS DON'T kvetch about the limitations of their medium. They make them into art work. The WaveRider lives by that ethic, using standard MIDI technology to transform a set of standard human diagnostic signals—brainwaves, heartbeat, muscle responses—into music. Berkeley-based WaveAccess designed the WaveRider to do anything from biofeedback to performance, and the music really comes from inside.

ADAM ROGERS and
JENNIFER TANAKA

Ohm: Creating a biosymphony

ONLINE

Make Your Own Web Page

IN THE ONLINE SERVICE horse race, it looks as if Prodigy is leading in the Web lane. At the end of this month it will introduce Prodigy Personal Web Pages—a feature that could make every Prodigy member a Web publisher. The designers have made six Web "tem-

plates" to make it easy to design pages. All you do is call up a template, fill in the blanks (like "Your name" or "Your favorite URL"), save it and—bingo!—all the Web will be able to view your page, reachable through the Prodigy site. The service is free up to 200K of storage.

Easy Access to WWW

Hypertext: pointers / cross-links

WWW browser: navigation tool

- Netscape
- Mosaic
- Lynx

Technology Focus

See the Latest Advances in

- Transportation Systems
- Surfing the Internet
- Corrosion Prevention
- Embedded Microelectronic Systems

Intelligent Transportation Systems

Michael J. Demetsky, Professor, Department of Civil Engineering and Applied Mechanics

Intelligent Transportation Systems (ITS) use state-of-the-art or advanced technology to improve travel and safety on our Nation's surface transportation system. The national ITS program focuses on the development and deployment of a collection of twenty-nine user services. These user services have recently been classified according to seven user service bundles:

- travel and transportation management
- travel demand management
- public transportation operations
- electronic payment
- commercial vehicle operations
- emergency management and
- advanced vehicle control and safety systems.

To advance the development, testing, and ultimate deployment of these user services, the national ITS program includes initiatives by the private and public sectors. These include research and development activities, operational tests, system architecture development, institutional/policy studies, and deployment support efforts.

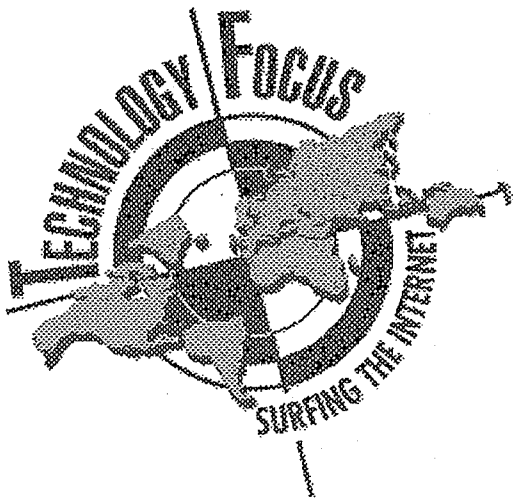

Because the majority of ITS projects are cooperative efforts among the private sector, government, and universities, this track will bring private companies, DOT officials and university faculty together to explore mutual interests.

Surfing the Internet

Alfred C. Weaver, Professor of Computer Science and Director, Computer Networks Laboratory

Want to know what it's like to surf the Internet? This track will give you instruction, exposure, and hands-on experience with the fastest growing information superhighway in the world. First, we'll talk about the structure of the Internet, who uses it, and why. Then, we'll talk about the types of information available and give you a live demonstration showing how to acquire useful information. We'll show you how to use hypertext documents (text, audio, pictures, and movies). We'll also show you some UVA developments in automating the storage, retrieval, and dissemination of knowledge. After the lectures and demos, we'll take you into our research labs and show you our vision of the Internet of the future, including:

- telemedicine applications
- multicast media
- virtual reality
- automated search and retrieval
- electronic commerce on the Internet.

Assisting Industry with Corrosion Prevention, Failure Analysis, and Materials Selection

Glenn E. Stoner, Director, Center for Electrochemical Science and Engineering (CESE)

CESE is the largest academically based program dedicated to environmental effects on engineering materials in the U.S. The center involves six faculty members, one visiting faculty, one research engineer, and one administrative staff member. We currently have \$2.6 million in research funding, 35 graduate students, and 28 corporate sponsors. However, another aspect of our center's activities involve serving industry on a short term basis (a single day up to multiyear) in the areas where industry requires an answer, a new technique, some analysis or a better understanding of some aspect of their corporate activity which becomes concerned with environmental attack of materials used in producing, containing, shipping or using their products. The presentation will focus on examples where industry has benefitted from our center in the past and will include some of the topics listed below:

- accelerated new test development
- analysis and prevention of failures during manufacture
- corrosion failures during storage
- materials selection and compatibility

Embedded Microelectronic Systems

Ronald Williams, Associate Professor: Center for Semicustom Integrated Systems (CSIS)

James Aylor, Director: Center for Semicustom Integrated Systems (CSIS)

Robert Ross, Research Scientist: CSIS, Systems Integration Laboratory

In order to stay competitive in today's fast paced electronics market, developers must produce high performance, low-cost, miniaturized robust designs quickly. These designs must demand less power and be more easily maintained than their predecessors. To meet these goals, the University of Virginia's Center for Semicustom Integration Systems employs progressive design methodologies which enable developers to make correct decisions early in the design process. In this session, we will discuss state-of-the-art design techniques including:

- logic synthesis
- design for testability
- virtual prototyping
- designing with programmed logic
- using surface mount technology

<http://www.cs.virginia.edu/~robins/>

Office: 210 Olsson Hall, UVa

Gabriel Robins is Assistant Professor in the Department of Computer Science, at the University of Virginia, where he received an NSF Young Investigator Award, a University Teaching Fellowship, and an All-University Outstanding Teaching Award. He completed his Ph.D. in Computer Science in 1992 from UCLA, where he received an IBM Fellowship and a Distinguished Teaching Award. His primary area of research is VLSI CAD, with recent work focusing on performance-driven layout, and additional research interests including computational geometry, motion planning, pattern recognition, and computational biology. Gabe recently co-authored a book on high-performance routing, and is a member of the Defense Science Study Group, an advisory panel to the U.S. Department of Defense. He is General Chair of the ACM/SIGDA Physical Design Workshop (1996), and he serves on the technical program committees of the IEEE International Symposium on Circuits and Systems, the IEEE International ASIC Conference, and the Great Lakes Symposium on VLSI. He is a member of ACM, SIGDA, SIGACT, IEEE, SIAM, and MAA.

SEAS Office of the Dean

Welcome to the home page for the School of Engineering and Applied Science at the University of Virginia. The school is composed of the following departments:

- Biomedical Engineering
- Chemical Engineering
- Civil Engineering and Applied Mechanics
- Computer Science
- Electrical Engineering
- Engineering Physics
- Materials Science and Engineering
- Mechanical, Aerospace, and Nuclear Engineering
- Systems Engineering
- Technology, Culture and Communication

Meet our new Dean, Richard Miksad.

Read the SEAS brochure.

Read the *all new* 1995 SEAS Fact Sheet.

The Dean's Offices

The School of Engineering and Applied Science has a number of offices which provide services to the faculty and the students. Included are:

- The Office of Career Planning and Placement. This gopher site maintains information about job openings, interview strategies, etc.
- The Office of Minority Programs under the supervision of Ron Price. This office helps increase the recruitment, retention, and success of minority students.
- The Office of Preaward Research Administration under the supervision of Dee Van. This office maintains links to forms, UVA-specific proposal guidelines, budget information and other information used to prepare grant proposals.
- The Office of Postaward Research Administration under the supervision of Faye Cline.
- The Research Development Office under the supervision of Bobbe Nixon. This office includes a rich page of links to grant sponsoring agencies.
- The SEAS Budget Office.

Also involved with university research is the Office of the Vice Provost for Research

In addition, this office maintains links to projects and organizations which provide funding opportunities geared for our students. The links include:

Scholarship Foundation of America, Inc.

The Ada Project

Mostly, but not entirely, geared toward women and minorities.

These are some of the UVA logos you can find here and there throughout the web pages here at UVA.

We are keeping statistics about who has visited our page.

Experimental Stock Market Data

The feed has been restored. Thank you for your patience. Thanks to Martin Wong for working to restore the data feed. Mutual fund prices are current to May 12, 1995.

This is an experimental page that currently provides a link to the latest stock market information. It is updated automatically, usually between 10:00 p.m. EDT and 1:00 a.m. EDT, from an email source in California to reflect the current day's closing information. It consists of general market news and quotes for selected stocks. Not all stocks are included here; see here for the ticker symbols of the included stocks.

Stock prices are "Deemed reliable, but never guaranteed." For reliable stock prices consult a licensed stockbroker or a reputable financial newspaper or service. For more information about the source of these quotes, or to get on the mailing list to receive these quotes directly please contact *martin.wong@eng.sun.com*. The charts available below are part of a free value-added service provided as an experiment by Mark Torrance at the M.I.T. Artificial Intelligence Laboratory.

Please *do not send mail* to request that this service track a given stock that is not provided in the source data; **I have no control over which stocks are provided.**

- Stock charts of price and volume movement (updated daily)
- Mutual Fund charts of price movement (data from InterTrade as of 5/12/95)
- Top stocks, the most frequently graphed stocks of late
- The stock quotes extracted from the latest issue of the quote file
- The latest issue of the email quote file (~76 Kbytes)
- The list of companies and ticker symbols for these stocks sorted by symbol, or a comprehensive list of ticker symbols sorted by company
- A directory of historical datafiles extracted and used to draw these graphs
- Information about how the graphs are drawn

- Other finance information available on the Web (**improved 1/10/1995**)

Please send mail to the stockmaster at the address below if any of the following is true:

- If you know the name of a company which this service tracks, currently listed as "(unknown)"
- If you know the name and symbol for a mutual fund which you would like to have added to the mutual fund charts page, **and which you are sure is present in my source data from InterTrade**
- If you have specific suggestions for ways to improve the service

If you would like a particular mutual fund added that is not in the InterTrade data, or you aren't sure whether it is, you can ask them to add it by sending email to 72066.3043@compuserve.com. I cannot guarantee a response to your message; usage of this service has increased dramatically since it was mentioned in an article in the Washington Post business section on April 10, 1994 .

Note: You may find it helpful, if you are using NCSA Mosaic for X-windows, to set your fixed font to a smaller size for viewing this and other 80-column ("preformatted") text in the default Mosaic document view. You can do this by inserting the text

`Mosaic*plainFont: *adobe-courier-medium-r-normal--12-*`

into your .Xdefaults file.

Fly a Jet at Mach 2 in Moscow!

You can fly this MiG-29UB

"It was incredible. Fantastic. The best experience in my life." - Time

"There is no equivalent to going up in one of the world's top-performance aircraft." - Newsweek

The thrill of supersonic flight in one of the world's finest flying machines is now available to a select few. Are you ready for the thrill of a lifetime?

Have you ever fantasized about zipping into a flight suit, going over your flight plans with one of the world's best pilots, then strapping yourself into the cockpit of one of the very best jet fighters ever made?

Have you ever daydreamed about an afterburner takeoff, the twin-jets pumping out 36,000 pounds of pure thrust, flattening you against your seat as the jet screams into the air in less than 700 feet of runway?

Do you long to know the pure exhilaration of taking tight turns at up to 9 g's?

Do you want to do the sort of flying that only the best pilots in the world are privileged to enjoy?

All this can be yours.

Fly With Us, the original Russian purveyor of military flights for civilians, is your host on your vacation of a lifetime.

You fly to exotic, enchanting Moscow and stay in a first class hotel. At your choice, you can visit some of the world's best theaters, restaurants, museums and exotic nightclubs and casinos.

But that's not the good part.

Depending on the flight program you choose, you will be taken to a Russian airbase that was once wrapped in a shroud of secrecy. After your security clearance, you are driven to the flight center where you meet your pilot - a member of the prestigious Test Pilot's Association, the true elite of Russian pilots.

After a physical, you undergo a basic preflight safety course. Finally, a high-performance g-suit is selected and fitted for you.

From there, it's out to a visual inspection of your plane, the world-famous and world-feared MiG-29 Fulcrum B supersonic fighter. As your flight technicians swarm over you, strapping you into the cockpit, you are given final pre-flight instructions. Then, the canopy swings down and you and your pilot are sealed into one of the best planes ever built.

If you have never flown supersonic or pulled high-g's, you quite simply don't know what you are missing. There is no analog. Truly, a once-in-a-lifetime experience.

And, you get to fly the jet fighter yourself. Incredible as that seems, you actually will be given the opportunity to take the controls and perform maneuvers. Depending on your interest, your experience and your comfort, you can actually perform high-g turns, tight loops, and other high-performance maneuvers. Your English-speaking pilot will work with you, making sure you get to customize your unique flying vacation.

The flight is ready now. *Are you?*

| [Return to Main Page](#) |

The Planes

Fly With Us! prides itself on its singular ability to match you to the plane of your dreams. Among the planes available to you:

L-39 Albatross

This is the main jet fighter trainer used in what used to be called the Eastern Bloc and is used by the Russian Knights, their equivalent of the Blue Angels. Similar to the German Alpha jet, it is capable of speeds in excess 490 knots and pulling 6 g's. This is a perfect plane for learning maneuvers and getting familiar with Russian flight techniques.

Maximum speed 485 mph Maximum g: +6, -3 Climb rate: 3400 ft/min.

MiG-21 Fishbed

A single-engine supersonic fighter, this tested and proven fighter has been used in Vietnam and during the Gulf War. Here is your chance to experience a full-afterburner aerobatic flight in one of the most widely flown and tested jets in the world.

Maximum speed Mach 2.0 Maximum g: 7 Climb rate: 30,000 ft/min.

MiG-29 Fulcrum B

This is the showcase twin-engine air-superiority jet fighter of Fly With Us. Its ability to take off in next-to-no distance and time, its incredible acceleration while purely vertical and its top speed of Mach 2.3 qualifies this fighter as one of the best planes ever built. Although it looks somewhat like the F-18, it is uniquely capable of maneuvers like the tail-slide, you will be amazed at its subsonic maneuvering.

Maximum speed Mach 2.3 Maximum g: 9 Climb rate: 60,000 ft/min.

MiG-25 Foxbat

This is the world's fastest combat aircraft, used primarily for interceptor and reconnaissance units. It was built to overtake the American SR-71 reconnaissance

plane. In the Fly With Us program, it's as close as your likely to get to the edge of space. This flight is basically straight up, accelerating so fast that you could light a cigarette on the cockpit window!

Maximum speed Mach 3.3 Maximum ceiling: over 13 miles Climb rate: 33000 ft/min.

Su-27 Flanker

Although the MiG-29 is more famous outside of Russia, this all-weather jet fighter is considerably bigger and has more powerful engines. This is the plane that first performed the incredible Cobra and, more recently, the Hook maneuvers - maneuvers that no American pilot has ever performed. This is considered by many as the world's best interceptor/fighter.

Maximum speed Mach 2.2 Maximum g: 9 Climb rate: 33000 ft/min. Roll rate: 270°/sec.

Mil-24 Hind

This helicopter, perhaps most famous for its role in Afghanistan, is one of the most elegant, high-performance jet helicopters ever made - very similar to the American-made Apache helicopter. You and your pilot will have the chance to perform the most intricate of maneuvers as you take this attack helicopter through its paces.

Maximum speed 192 mph Climb rate: 2800 ft/min.

The Airbase

Fly with us and get the extraordinary opportunity to experience the Flight Research Institute located at the once-secret Zhukovskiy Air Base. There really is no American equivalent to the FRI. It is as if Boeing, McDonnell Douglass, NASA, GE, Grumman and Cessna decided to concentrate their efforts in a single place. All flight research and test programs, all flight records, and all prototypes are tested at this amazing facility.

This is the world's largest flight research center. Tupolev, Iliushin, Yakolev, Miasischev, Mikoyan, Sukhoi, Antonov all maintain their research and design facilities here. With the presence of the Russian Aeronautical and Aerospace Institute, you are at the very center of the Russian aerospace community.

Price Schedule

Prices Subject to Change Without Notice. VIP Packages include 5 days and 4 nights stay in Moscow. Your VIP treatment starts upon your arrival in Moscow, where you will be picked up in our limosine, chauffeured to the world-famous Metropol Hotel, part of the Intercontinental Hotel chain. The caviar and champagne will be waiting in your room.

The Standard packages include 3 days and 3 nights in the Belgrade Hotel or Government Ministry, formerly used by visiting foreign dignitaries and diplomats.

After several hundred flights, we can suggest the following packages as the most popular. Naturally, you can custom design a package of your dreams.

Don't forget to see our incredible Spring Price Special! All prices shown here are lowered by 10% if you fly before May 1, 1995.

L-39 Advanced Fighter Trainer

VIP Package \$6735 Total of 5 flights

- Day 1 Arrival, Museum
- Day 2 Medical Check, 1 Flight on L-39
- Day 3 2 Flights on L-39
- Day 4 2 Flights on L-39
- Day 5 Free Program, Departure

TOP Package \$2995 Total of 2 flights

- Day 1 Arrival, Museum
- Day 2 Medical Check, 1 Flight on L-39
- Day 3 2 Flights on L-39, Departure

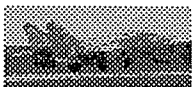

MiG-21 Supersonic Combat Trainer

VIP Package \$6300 Total of 3 flights

- Day 1 Arrival, Museum
- Day 2 Medical Check, 1 Flight on L-39
- Day 3 1 Flight on L-39

Welcome to the Central Intelligence Agency Server

Coming Soon...

CIA MISSION

In support of the DCI's fundamental role as principal advisor to the President on national foreign intelligence matters, the Agency's mission is to:

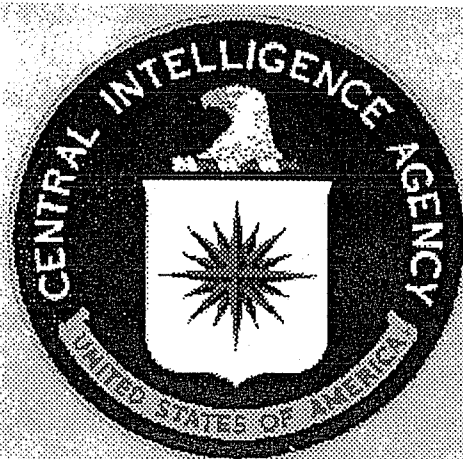

Provide the President and his senior advisors with accurate, comprehensive, and timely foreign intelligence relating to the national security; and to conduct counterintelligence activities, special activities, and other functions relating to foreign intelligence and national security as the President and the National Security Council may direct.

To fulfill its mission, the CIA must collect, process, exploit, analyze, and disseminate foreign intelligence by employing a highly skilled diverse workforce and state-of-the-art technical systems and devices; protect intelligence sources and methods; conduct research on, develop, and procure technical systems and devices; protect the security of its installations, activities, and people; and provide necessary administrative and logistical support, as well as services of common concern to the Intelligence Community.

Geography

Location: Caribbean, in the eastern Caribbean Sea, about two-thirds of the way between Puerto Rico and Trinidad and Tobago

Map references: Central America and the Caribbean, South America, Standard Time Zones of the World

Area:

total area 620 sq km

land area 610 sq km

comparative area slightly less than 3.5 times the size of Washington, DC

Land boundaries: 0 km

Coastline: 158 km

Maritime claims:

contiguous zone 24 nm

exclusive economic zone 200 nm

territorial sea 12 nm

International disputes: none

Climate: tropical, moderated by northeast trade winds; dry season from January to April, rainy season from May to August

Terrain: volcanic and mountainous with some broad, fertile valleys

Natural resources: forests, sandy beaches, minerals (pumice), mineral springs, geothermal potential

Land use:

arable land 8%

permanent crops 20%

meadows and pastures 5%

forest and woodland 13%

other 54%

Irrigated land: 10 sq km (1989 est.)

Environment:

current issues deforestation; soil erosion

natural hazards subject to hurricanes and volcanic activity

international agreements party to - Biodiversity, Climate Change, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Whaling

People

Population: 145,090 (July 1994 est.)

Population growth rate: 0.52% (1994 est.)

Birth rate: 23.12 births/1,000 population (1994 est.)

Death rate: 5.84 deaths/1,000 population (1994 est.)

Net migration rate: -12.05 migrant(s)/1,000 population (1994 est.)

Infant mortality rate: 18.5 deaths/1,000 live births (1994 est.)

Life expectancy at birth:

total population 69.36 years

male 67.06 years

female 71.83 years (1994 est.)

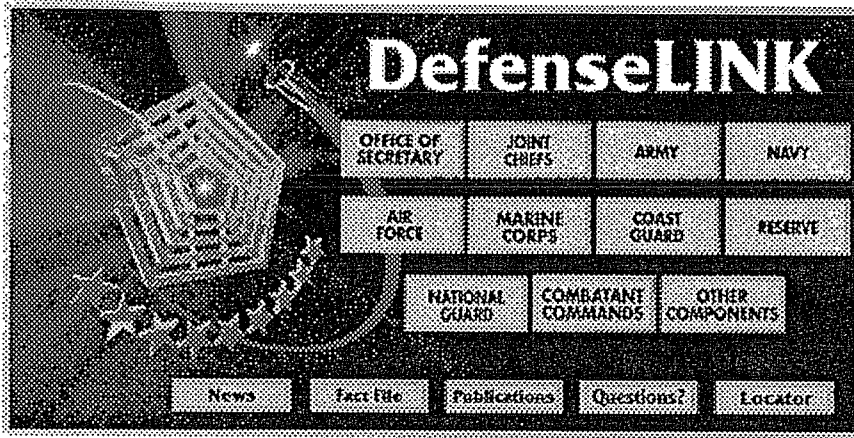

Total fertility rate: 2.5 children born/woman (1994 est.)

Nationality:

noun Saint Lucian(s)

adjective Saint Lucian

AirForceLINK is the **Department of the Air Force Home Page**.

The Mission of the U.S. Air Force is to defend the United States through control and exploitation of air and space. The Vision: Air Force people building the world's most respected air and space force - global power and reach for America.

The Department of the Air Force is headquartered in the Pentagon, Washington D.C. The service is organized in eight major commands throughout the world which provide combat aircraft, airlift, refueling, reconnaissance and other support to the Unified Combatant Commands.

The Air Force also has more than three dozen Field Operating Agencies and Direct Reporting Units who directly support the mission by providing unique services.

Together with Air Force Reserve and Air National Guard forces, the United States Air Force is the best in the world.

The Secretary of the Air Force is Sheila E. Widnall. The Air Force Chief of Staff is Gen. Ronald R. Fogleman. Chief Master Sergeant of the Air Force is CMSAF David J. Campanale.

Contents

- News: Current Air Force News and Information
- Fact Sheets: Major Weapons Systems and Air Force Commands

- Air Force Leaders: Biographies
- Air Force Publications: Air Force Issues & AFNS Features
- Photos: File Photos and Current Operations
- Air Force Servers: Links to other Air Force Servers

- What's New in AirForceLINK: Most recently added services
- Overview: How AirForceLINK is organized
- Air Force FAQ: Frequently Asked Questions

As you browse these pages, let the Air Force Song, (245K) play in the background. It is performed by the Air Combat Command Heritage of America Band.

AirForceLINK is provided through the cooperative efforts of the Office of The Secretary of The Air Force (Public Affairs), and the Defense Technical Information Center (DTIC). This is a government computer system. We welcome comments and suggestions.

UNITED STATES MARINE CORPS

From the halls of Montezuma to the shores of Tripoli. We will fight our country's battles in the air on land and sea. First to fight for right and freedom and to keep our honor clean. We are proud to claim the title of United States Marines.

- Marine's Hymn -

-
- Mission of the Marine Corps
 - Marine Corps History and Traditions
 - What does the Marine Corps have to offer you?
 - Marine Corps Ftp library
 - Visit other Marine sites
 - Marine Corps Concepts and Issues
 - A Tradition of Honor, A Vision of the Future
 - Joint Warrior Interoperability Demonstration
 - Information for Marines
-

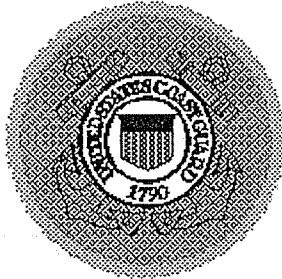

For More than two hundred years, the Marines have stood as America's symbol for courage, determination and strength of character. Whenever our nation has faced a crisis, the Marine Corps has been called on to protect our liberty. That's why uncommon valor is seen as a common virtue in every Marine. We have a reputation for being America's finest fighting force, and we expect every Marine to live up to this standard.

Comments or Suggestions

Thank you for visiting the United States Marine Corps Home Page.

We welcome your comments or suggestions. We can be reached via e-mail or you may call us direct at (703)614-3039. DSN 224-3039

United States Coast Guard

Click on this line to see how many times this page has been accessed by individual users (updated every 24 hours).

Welcome to the U.S. Coast Guard Home Page. Our goal is to make available information on Coast Guard missions and activities nationwide. Coast Guard information pages are always under construction and being updated, and links to new pages are being added all the time. Every effort is made to ensure the accuracy and currency of the information provided here and we welcome comment or corrections.

NOTICE/DISCLAIMER: The content of these pages is unofficial and not authority for action. Views and opinions expressed do not necessarily reflect those of the U.S. Department of Transportation or the U.S. Coast Guard. Information may be reprinted except AP wire stories and articles republished from other sources. Commercial use of Coast Guard emblems, logos, or other graphics must be approved by the Commandant of the U.S. Coast Guard.

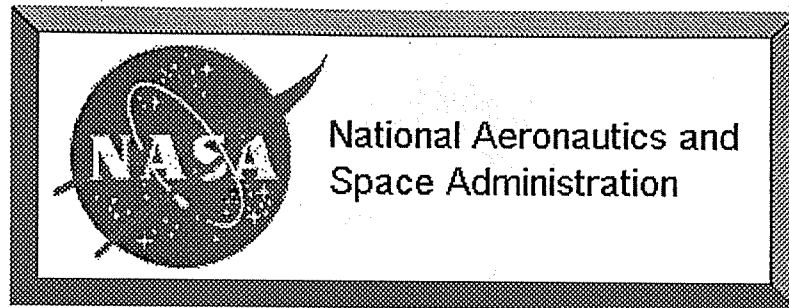

What's New?

Be sure to check out our listing of new information.

Note: As of May 11, 1995, you may also access this page at <http://spiderweb.dot.gov/dotinfo/uscg/welcome.html>.

Currently running as a quasi-mirror site, this will be the location to which all Coast Guard files will be migrated by the end of summer 1995.

Family Life at the White House

When Bill Clinton was a senior in high school, he was selected to go to Washington, D.C., to be part of Boys Nation. Bill Clinton was one of the first in line to shake President Kennedy's hand in the Rose Garden. After that, he knew he wanted to make a difference in the lives of people by becoming President of the United States. This photo is one of his

most cherished possessions

The President and Mrs. Clinton believe very strongly in the importance of being involved

in one's community. Here, the President and Mrs. Clinton help prepare Thanksgiving Dinner for homeless people at New Covenant Baptist Church in Washington, DC. This is a family tradition they started in Arkansas.

Hillary Clinton, who has always found time to work with the children of the community,

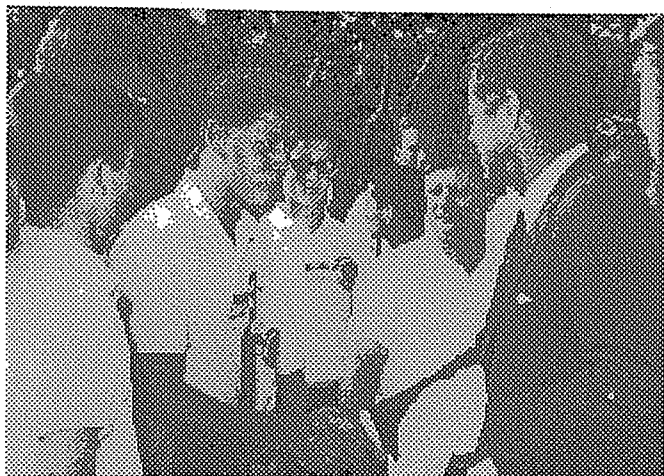

joins in on the fun at a local school with two young artists

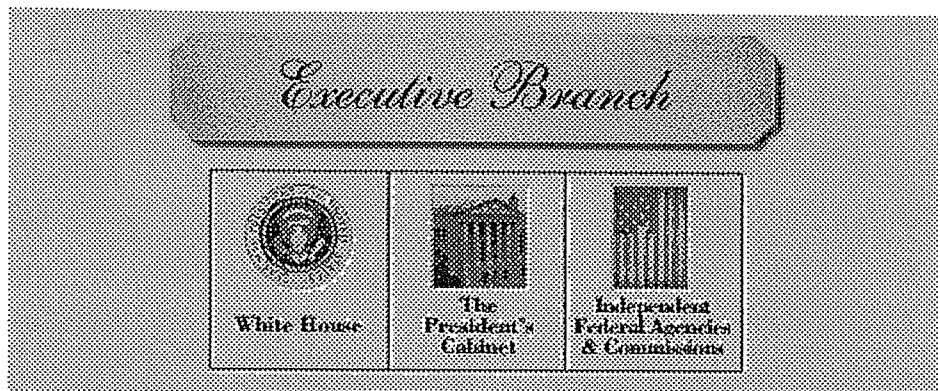

To relax, President Clinton plays the saxophone , and occasionally, a round of

golf

There are four ways to use this service to look for government information:

- By selecting a government agency from one of the categories in the image above.
- By agency using a map of Washington, D.C.
- By a subject index to government information online, which is provided by FedWorld.
- By a government information locator service (GILS), which is an index being built to all government information.

Find Information from Other Branches of the Government

White House Electronic Publications

The choices below offer you various ways to access electronic publications by the White House according to your interests. These documents include press releases, policy briefings, speeches, executive orders, Congressional testimony, and other documents.

1. Daily Press Releases

○ Browse Documents

- Today's releases.
- Daily press briefings.
- This week's releases.
- Daily summaries.
- Browse publications by date.

○ Retrieve Documents

You may find documents of interest by searching for words in the full text or by selecting combinations of prespecified categories.

- Retrieve via *search index* showing the full taxonomy of categories.
- Retrieve via *forms interface* to most of the taxonomy of categories.

2. Topical Releases

- Browse briefings on economic policy.
- Browse briefings on environmental policy.
- Browse briefings on foreign affairs.
- Browse briefings on jobs.
- Browse releases on healthcare.
- Browse releases on science and technology [1993, 1994].

3. Major Documents

- Speeches by the President
- Proposed US Budget for FY1996
- 1995 State of the Union Address
- Health Security Act
- National Information Infrastructure
- National Performance Review
- Technology for Economic Growth: President's Report

4. National Documents

- Major International Treaties
 - North American Free Trade Agreement
 - General Agreement on Tariffs and Trade
- Historical Documents
 - Declaration of Independence
 - The United States Constitution

5. Subscribe Via Email

- Subscribe to daily publications through an email server.

INTERNET SEARCH

If you're trying to find a particular site or document on the Internet or just looking for a resource list on a particular subject, you can use one of the many available on-line search engines. These engines allow you to search for information in many different ways - some search titles or headers of documents, others search the documents themselves, and still others search other indexes or directories.

EDS

Experience the
EDS Home Page

SEARCH ENGINES

INFOSEEK SEARCH

InfoSeek is a comprehensive and accurate WWW search engine. You can type your search in plain English or just enter key words and phrases. You can also use special query operators:

THE LYCOS HOME PAGE: HUNTING WWW INFORMATION

This search engine, served by Carnegie Mellon University, will allow you to search on document titles and content. Its May 1 database contains 3.75 million link descriptors and the keywords from 767,000 documents. The Lycos index is built by a Web crawler that can bring in 5000 documents per day. The index searches document title, headings, links, and keywords it locates in these documents.

WEBCRAWLER SEARCHING

This engine allows searches by document title and content. It is part of the WebCrawler project, managed by Brian Pinkerton at the University of Washington, which collects documents from the Web.

SEARCH ENGINE SEARCH

If you still haven't found what you're looking for and you'd like to try out other available search engines, check out these other lists of search engines:

W3 SEARCH ENGINES

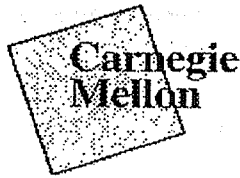

Published by the University of Geneva, this list of search engines covers a wide variety of topics and subjects but isn't updated very often.

CUSI (Configurable Unified Search Interface)

Nexor U.K. offers this tool, a single form to search a large number of different WWW engines for documents, people, software, dictionaries, and more.

LycosTM

The Catalog of the Internet

A 1995 GNN Best of the Net Nominee. Over 14 million queries answered.

-
- Carnegie Mellon issues non-exclusive license to NlightN.
 - Search the big Lycos catalog (4.35 million web pages), or if you have forms, use the Lycos search form to set the number of hits, and other options. You can also try the experimental Windows NT-based big Lycos catalog.
 - Search the small Lycos catalog (566k web pages), or if you have forms, use the Lycos search form to set the number of hits, and other options.
 - Lycos: Frequently Asked Questions
 - Lycos: Register your own pages, or Delete your own pages
 - Lycos: News
 - Lycos: Usage stats
 - Lycos: Specifics
 - Lycos: Results
 - Lycos: Documentation
 - Lycos: Beta Test
 - Lycos: Legal Notices
 - Internet search, pointers to other searchers.
 - Lycos is supported by funds from
 - Carnegie Mellon University (CMU),
 - The Corporation for National Research Initiatives (CNRI), and
 - The Advanced Research Projects Agency (ARPA).

Please report bugs to fuzzy@cmu.edu.

WHAT'S NEW?

The Net's explosion has brought with it an explosion of pages devoted to the hundreds of new sites coming on-line every day. Some what's-new sites throw up list after long list of new URLs; others go through a selection process. Users ultimately decide which type of list is best for them.

Netscape would like to offer users an opportunity to submit the name and URL of any new site via our on-line submission form. Because there are now so many other what's-new lists that feature each and every new site, we'll be going through our submissions and presenting sites that are not only new to the Net but that use or advance the technology of the Net in new ways.

We hope to archive these lists as a resource for users to find recent, important additions to the Net culture and workplace. As always, feel free to e-mail your comments, gripes, etc. to editor@netscape.com.

ONSALE

The silent auction is far from going, going, gone.

UNICOM ONLINE CATALOG

Unicom provides the most comprehensive local area network (LAN) computer hardware line from start to finish.

COMMERCEPARK

Communications professionals helping advertising agencies and others deliver Internet marketing

DATUM ONLINE

An international magazine for innovative developments in theater, visual art,

performance, and literature. In Dutch, English, and German

CHAMPLAIN

An easy search mechanism for those interested in Canadian Government information on the Internet

HARVARD ESPRESSO COMPANY

A selection of fine gourmet coffees, a brief history of coffee, coffee tips, and ordering instructions

SMARTBIZZ

Affordable WWW-page creation for limited and/or temporary sites; nonprofit organizations free of charge

KING PAGE -

Stephen King in all his gory

LEE'S PHOTOS OF ICELAND

Over a dozen high-quality photos of Iceland

PC QUOTE FREE STOCK QUOTES

Unlimited free stock quotes

TRAVELSPHERE

A guide to bed and breakfasts, hotels, resorts, restaurants, and travel agencies around the world

PAUL'S BEER PAGE

The art of "real ale" in the U.K., with a list of beer festivals

INDEX - AFRICAN AMERICAN DIRECTORY

A growing list of links about African American businesses, artists, and sites of interest

BIG NOISE SOFTWARE

Software for musicians by musicians

FAQ - FELINE LEUKEMIA

A valuable resource for cat owners

BIOTECH COMPANY WWW REGISTRY

Comprehensive list of Internet addresses of biotech or biotech-related companies on the Internet

SAN GABRIEL CUSTOM FONTOLOGISTS

A developer of custom fonts for various platforms

DISCOVER MAGAZINE

All areas of science and technology, for a general audience

FLANDERS INT'L FILM FESTIVAL

Belgium's most prominent yearly film event: historical outline, practical info, guest lists, programme profile, dates, events

GADGET GURU

The nexus for gadget and gizmo-related information

- External Images, Sounds, and Animations
- Troubleshooting

- Avoid Overlapping Tags
- Embed Anchors and Character Tags, But Not Anything Else
- Check Your Links
- A Longer Example
- For More Information
 - Fill-out Forms
 - Style Guides
 - Other Introductory Documents
 - Additional References

Acronym Expansion

WWW

World Wide Web (or Web, for short).

SGML

Standard Generalized Markup Language -- this is a standard for describing markup languages.

DTD

Document Type Definition -- this is a specific markup language, written using SGML.

HTML

HyperText Markup Language -- HTML is a SGML DTD. In practical terms, HTML is a collection of styles (indicated by markup tags) that define the various components of a World Wide Web document.

What This Primer Doesn't Cover

This primer assumes that you have:

- at least a passing knowledge of how to use NCSA Mosaic or some other Web browser
- a general understanding of how Web servers and client browsers work
- access to a Web server for which you would like to produce HTML documents, or that you wish to produce HTML documents for personal use

Creating HTML Documents

HTML documents are in plain (also known as ASCII) text format and can be created using any text editor (e.g., Emacs or vi on UNIX machines). A couple of Web browsers

(tkWWW for X Window System machines and CERN's Web browser for NeXT computers) include rudimentary HTML editors in a WYSIWYG environment. There are also some WYSIWIG editors available now (e.g. HotMetal for Sun Sparcstations, HTML Edit for Macintoshes). You may wish to try one of them first before delving into the details of HTML.

*You can preview a document in progress with NCSA Mosaic (and some other Web browsers). Open it with the **Open Local** command under the **File** menu.*

*After you edit the source HTML file, save the changes. Return to NCSA Mosaic and **Reload** the document. The changes are reflected in the on-screen display.*

The Minimal HTML Document

Here is a bare-bones example of HTML:

```
<TITLE>The simplest HTML example</TITLE>
<H1>This is a level-one heading</H1>
Welcome to the world of HTML.
This is one paragraph.<P>
And this is a second.<P>
```

Click [here](#) to see the formatted version of the example.

HTML uses markup tags to tell the Web browser how to display the text. The above example uses:

- the <TITLE> tag (and corresponding </TITLE> tag), which specifies the title of the document
- the <H1> header tag (and corresponding </H1>)
- the <P> paragraph-separator tag

HTML tags consist of a left angle bracket (<), (a “less than” symbol to mathematicians), followed by name of the tag and closed by a right angular bracket (>). Tags are usually paired, e.g. <H1> and </H1>. The ending tag looks just like the starting tag except a slash (/) precedes the text within the brackets. In the example, <H1> tells the Web browser to start formatting a level-one heading; </H1> tells the browser that the heading is complete.

The primary exception to the pairing rule is the <P> tag. There is no such thing as </P>.

NOTE: *HTML is not case sensitive. <title> is equivalent to <TITLE> or <Title>.*

W3 servers

This is the summary of a list of registered WWW servers alphabetically by continent country and state. (About this list)

See also: data available by other protocols , data by subject , how to make a new server , test servers , automatically collected list of Home Pages, What's New, and the clickable world map . If servers are marked "experimental", you should not expect anything. Please see how to send announcements of new servers (or modify your server's description).

APPROVAL TO REPRODUCE & DISTRIBUTE NEWSWEEK MATERIAL

Department of Computer Science
Gabriel Robins
University of Virginia
Thronton Hall
Charlottesville, VA 22903-2442

RE: LECTURE ON THE INTERNET AND WORLD WIDE WEB

NEWSWEEK material: 5/29/95 Tanaka/A.Rogers CYBERSCOPE in entirety

Under the conditions outlined below, I am pleased to write that Newsweek will not object if you distribute the NEWSWEEK material listed above. I regret that the number of articles that we publish weekly prevents us from providing reprints of the articles at this time. (Back issues of NEWSWEEK, in their entirety, are available for sale through our back copy office in New Jersey -- (201) 316-2229).

1. Each page may be photocopied in its entirety but may not be altered or abridged.
2. The first page must display the notice: "Copyright [year of initial publication], Newsweek, Inc. All rights reserved. Reprinted by permission".
3. The reproduced material may not accompany any materials in which you a) advertise services or products; b) solicit payment, dues, contributions, or applications for membership; or c) endorse an individual or group for an elected office.
4. The reproduced material may not be sold or offered as a premium. (Except when recovering administrative cost for educational purposes.)

Please contact me by telephone 212-445-4870 with any questions. Your interest in NEWSWEEK is appreciated.

Sincerely,

Jeanne Willcoxon
Rights & Permissions Coordinator
(212) 445-4870
